ETS Begins Expansion of Covington, La Home Office

Enviro-Tech Systems [ETS] has decided to systematically grow the organization to meet the future needs of the Oil Industry in the Gulf of Mexico region and around the world. The expansion will start in the fall of 2011 and should be completed by early 2012. The growth comes on the building of strong relationships with other major oil companies in the Gulf of Mexico. Enviro-Tech Systems is also expecting a robust growth internationally in the oil and gas sector.

With its business Partners, Enerscope and Advanced Sensors, ETS has determined a process for further growth outside the traditional Separation Equipment offered. Using Smart Water Technology and Smart Water Discharge, ETS has been able to change the way offshore operators think about process water treatment. The expansion will allow for continued growth providing considerable office expansion along with a fabrication facility, machine shop Advanced Sensor assembly shop and testing shop.
